APPENDIX A: COVID-19 SYMPTOMS, TESTING & RETURN TO SCHOOL	15

INTRODUCTION

This plan has been developed in alignment with the Provincial COVID-19 Communicable Disease Guidelines for K – 12 Setting (Updated August 24, 2021) in British Columbia. The goal of this document is to support K – 12 education employees, students, parents, caregivers, administrators and school community members to:

- Be informed about communicable disease measures and how they support a safe school environment.
- Understand their roles and responsibilities in maintaining and promoting safe and healthy schools.

Itinerant staff, teachers on-call and visitors will be made aware of school's health and safety measures and that it is their responsibility to follow them at all times.

RESOURCES

The following Provincial guidance documents and websites have been used in preparing this Back to School Communicable Disease Plan:

- [Provincial COVID-19 Communicable Disease Guidelines for K-12 Settings](#)
- <https://www.worksafebc.com/en/covid-19/bcs-four-step-restart>
- [K-12 Education Recovery Plan](#)
- [BCCDC COVID-19 Public Health Communicable Disease Guidance for K-12 Schools](#)
- WorkSafeBC; <https://www.worksafebc.com/en/covid-19/bcs-four-step-restart>

KEY PRINCIPLES

- All school districts and independent schools are to adhere to the standards, guidelines, and protocols of the BC Centre for Disease Control and WorkSafeBC.
- Using the guidelines, school districts independent schools are required to have communicable disease plans, adjust the plans to reflect any updates in the guidelines.
- Psychological safety measures and trauma-informed practice will be valued and implemented alongside physical health and safety measures.
- Effective and ongoing communication with school leaders, community partners, Indigenous rights holders, parents, caregivers, students, unions, and employees is an essential aspect of successfully implementing the plans.

REGIONAL DIFFERENCES

Moving forward, Medical Health Officers will have the authority to put regional measures in place during times of increased community transmission of COVID-19 and within communities with low vaccination

uptake. Local Public Health Orders may be placed for entire regions, communities, including but not limited to schools, or for specific settings or activities within a health authority or region.

INFECTION PREVENTION AND EXPOSURE CONTROL MEASURES

The Exposure Control Measures are adhered to at Bulkley Valley Christian School to reduce the spread of communicable diseases like COVID-19. Our schools support these preventative measures by:

- Having staff model these behaviours
- Sharing reliable information from the BCCDC with parents, families and caregivers
- Promoting safety measures in the school through the use of visual aids and signage
- Striving to utilize positive and inclusive approaches that are not punitive or stigmatizing
- Using a trauma-informed lens when planning school activities and events

PHYSICAL DISTANCING AND SPACE ARRANGEMENT

Although public health no longer recommends learning groups and physical distancing of 2M as communicable disease measures for the K – 12 setting, there are a number of strategies schools will need to consider to help create space between people and to support students and staff in returning to school using a trauma-informed approach:

- Remind students and staff about respecting others personal space.
- Use available space to spread people out, both in learning environments and for gatherings and events, where possible.
- Implement strategies that prevent crowding at pick-up and drop off times.
- Take students outside more often, where and when possible.
- Manage flow of people in common areas, including hallways and around lockers, to minimize crowding and allow for ease of people passing through.
- Eliminate face-to-face seating arrangements
- Plan activities that try and eliminate involuntary physical contact

STAFF ONLY SPACES

Experience to date underscores the importance of COVID-19 prevention among adults, as well as students, in the school setting. We are using the [Provincial COVID-19 Communicable Disease Guidelines for K-12 Settings](#) to guide staff-only spaces within schools. [WorkSafeBC Guidance for Workplaces](#) will be used to determine what measures should be in place for non-school spaces such as Board Offices and Maintenance Buildings. Staff meetings and gatherings will be virtual unless in-person is specifically required.

ENTRANCES AND EXITS

There are separate entrances and exits for different divisions in the school. Elementary students are expected to be outside or in intramurals at lunch time. High school students will be encouraged to not crowd during lunch hour.

SCHOOL GATHERINGS AND EVENTS

School gatherings and events should be held virtually except as permitted by public health recommendations and orders. If gatherings or events must be in-person, the number of people in attendance is minimized as much as possible, does not exceed 50% operating capacity, and spectators are not present.

PERSONAL ITEMS

Staff and students can continue to bring personal items to school but will be encouraged not to share items that come in contact with the mouth (e.g. food, drinks, unwashed utensils, wind instruments).

Students can continue to use their lockers. Schools will implement site specific strategies to manage the flow of students around lockers to minimize crowding.

SUPPORTING STUDENTS WITH DISABILITIES/DIVERSE ABILITIES

Bulkley Valley Christian School will continue to implement health and safety measures that promote inclusion of students with disabilities/diverse abilities.

According to the [BC Centre for Disease Control](#) (BCCDC), most children with immune compromise can follow the same precautions for COVID-19 as the general population and can safely attend in-class instruction.

For students with severe immune compromise or medical complexity, consultation with a medical health care provider is recommended to determine if in-class instruction is safe.

Parents and caregivers with severe immune compromise are encouraged to contact the school principal to discuss available options for their child (ensuring appropriate preventative measures are in place for in-class instruction, online learning, or home-schooling).

Staff who are supporting students with disabilities/diverse abilities may need to be in close physical proximity or in physical contact with the student.

Staff working indoors with a student, where the service cannot be provided from behind a barrier, are required to wear a non-medical mask, a face covering or a face shield. Additional personal protective equipment is not required beyond that used as part of the personal care routine normally encountered in their regular course of work (e.g. gloves for toileting).

Staff will wear a face shield (transparent) to enable visualization of the mouth when working with students where seeing facial expressions and/or lip movement is important.

STUDENT TRANSPORTATION

Buses

Students in Grades K to 12 are required to wear non-medical masks, or face-coverings on school buses. Students will be spread out on the bus if empty seats are available. Hand-hygiene is encouraged before and after trips. Windows are open when weather allows.

Carpooling

It is recommended that staff and families who are carpooling follow this guidance:

- Spread out vehicle occupants as much as possible.
- Travel with the same people whenever possible.
- Set the vehicle's air to bring in fresh outside air.
- Open windows when weather allows.
- Clean hands before and after trips.
- Clean frequently touched surfaces.

For school activities, follow mask requirements.

CLEANING AND DISINFECTING

Regular cleaning and disinfection are essential to prevent the transmission of COVID-19 from contaminated objects and surfaces. Our school is cleaned and disinfected in accordance with the BCCDC's [Cleaning and Disinfectants for Public Settings Guidelines](#).

Classrooms and offices are provided with hand sanitizer, wipes, and food grade disinfecting spray to use throughout the day as required in classrooms. Bulkley Valley Christian School has implemented cleaning protocols for all common areas and surfaces, including washrooms, equipment, tools, common tables, desks, light switches, hand railings and door handles. Those engaged in cleaning have adequate training and materials.

Frequently touched surfaces in public spaces and washrooms will be cleaned at least twice in a 24-hour period by custodial staff.

Administration will arrange for or perform cleaning surfaces after a person's body fluids have contacted them after they have displayed symptoms of illness.

Frequently Touched Surfaces

Frequently touched surfaces include:

- Items used by multiple students and staff including doorknobs, light switches, hand railings, water fountains, faucet and toilet handles, tables, desks, chairs, manipulatives, and toys.
- Shared equipment such as computer keyboards, and tablets, glassware and testing equipment for science labs, kitchen equipment for culinary programs, sewing machines, PE/Sports equipment.

- Appliances staff and students can share such as microwaves, refrigerators, coffee pots, photocopiers, or laminators.
- Service Counters in offices and libraries.

Frequently touched items that are not easily cleaned (e.g. fabric, playdough, sand, foam) can be used as long as hand hygiene is practiced before and after use.

There is no evidence that the COVID-19 virus is transmitted via textbooks, paper, or paper-based products. Laminated or glossy-paper products and items with plastic covers can be contaminated if handled by someone with COVID-19; however, the risk is low. There is no need for these items to be cleaned and disinfected or quarantined for any period of time, or for hand hygiene to be practiced before or after use.

VISITOR ACCESS/COMMUNITY USE

Only visitors who directly support activities that are of direct benefit to student learning and wellbeing are permitted during the hours of 8:00 - 3:30.

ILLNESS AND SELF-ASSESSMENT POLICIES AND PROTOCOLS

Daily Health Check

A daily health check is a tool to reduce the likelihood of a person with COVID-19 coming to school when they are infectious.

- Parents/caregivers and students can utilize the new provincial K-12 Health Check app at <https://www.k12dailycheck.gov.bc.ca/healthcheck?execution=e1s1> for daily assessment of symptoms.
- Staff and other adults must complete a daily health check prior to entering the school.
- If a student, staff, or adult is sick, they must not enter the school.

The Bulkley Valley Christian School principal will:

- Inform staff, parents, caregivers, and visitors that they are responsible to complete a daily health check before entering the building and to stay home if they are sick.
- Inform parents, caregivers that they are to conduct a daily health check with their child and keep them home if they are sick.
- Procedures are established for students or staff members who become sick at work to go home as soon as possible.
- Procedures are established for students and staff to return to school/work after being sick.

Bulkley Valley Christian School will not require a health care provider note to confirm the health status of any individual, beyond those required to support medical accommodations.

STAYING HOME, SELF-ISOLATION AND SYMPTOMS

Stay Home when Required to Self-Isolate

Students, staff, or other adults must stay home if they are required to self-isolate by Northern Health. Additional information on self-isolation requirements and support is available from the BCCDC.

Symptoms of Illness and Return to School

Students, staff, or other adults should stay at home when sick, as this is one of the most important ways to reduce the introduction to and the spread of COVID-19 in schools. The following resources provide guidance regarding specific symptoms of illness:

- Parents/caregivers and students can use the K – 12 Health Check app.
- Staff and other adults can refer to BCCDC's "When to get tested for COVID-19."
- Staff, students, and parents/caregivers can also use the BCCDC online [Self-Assessment Tool](#), call 811 or their health care provider.

When a staff, student or other adult can return to school depends on the type of symptoms they experienced, if a COVID-19 test is recommended, and the type of illness they had. See Appendix A – COVID-19 Symptoms, Testing & Return to School for more information regarding what to do when experiencing COVID-19 symptoms.

Students and staff who experience symptoms consistent with a previously diagnosed health condition (e.g. seasonal allergies) can continue to attend school when they are experiencing these symptoms as normal. They do not require re-assessment by a health-care provider and should not be required to provide a health-care provider note. If they experience any new or unexplained symptoms, they should seek assessment by a healthcare provider.

Students or staff may still attend school if a member of their household develops new symptoms of illness, provided the student/staff has no symptoms themselves. If the household member tests positive for COVID-19, public health will advise the asymptomatic student/staff on self-isolation and when they may return to school.

If a student, staff, or other person develops symptoms during the day, they should report to the office. Office staff or administration will isolate the person, inform parents or caregiver, and complete any necessary cleaning or disinfection.

Hand Hygiene

Rigorous handwashing with plain soap and water is the most effective way to reduce the spread of illness (antibacterial soap is not needed for COVID-19).

The following guidelines will be followed in our schools:

- Diligent hand hygiene which means washing with soap and water for at least 20 seconds (water temperature does not change the effectiveness)
- Facilitation of regular opportunities to practice hand hygiene:
 - portable handwashing or sanitization stations where sinks are not available

- hand-sanitization is encouraged upon entry to the school, before/after breaks, using the washroom and using gym/playground equipment.
- Handwashing posters are displayed at handwashing and sanitization sites.
- Staff and students have received training about effective handwashing as well as to avoid touching their eyes, nose, or mouth with unwashed hands.

Respiratory Etiquette

Students and staff should:

- Cough and sneeze into their elbow, sleeve, or a tissue.
- Throw away used tissues and immediately perform hand hygiene.

Personal Protective Equipment (PPE)

Personal protective equipment (including masks) can provide an additional layer of protection. Non-medical masks and face coverings have a role to play in preventing the spread of COVID-19. They provide protection to the wearer and to those around them.

Those wearing masks should still respect others personal space.

K – 12 Staff

Regular communication to students and staff includes:

- wearing a mask is required under a public health order
- ensuring masks fit students
- even those who are unable to wear a mask all day are encouraged to wear one as much as possible.

All K – 12 staff are required to wear a mask or face shield (with a mask) indoors in schools and on school buses.

Staff who are supporting students with complex behaviours, medical complexities or receiving delegated care may need to be in close physical proximity or in physical contact with students. See p. 4, Supporting Students with Disabilities/Diverse Abilities.

K – 12 Students

All students in K to 12 are required to wear a mask or a face shield (with a non-medical mask) indoors in schools, in classrooms and on buses.

The use of masks should not reduce or replace other more effective infection prevention and exposure control measures in schools, such as:

- Ensuring students and staff are aware of their responsibility to perform a daily health check and to stay home when they are sick or if required to self-isolate.
- Daily cleaning and disinfection of frequently touched surfaces
- Frequent hand hygiene.

These measures provide multiple layers of protection that reduce the risk of transmission.

Schools and the school district will have non-medical masks available for staff and students, including anyone who becomes sick while at school.

VISITORS

All visitors must wear non-medical masks when they are inside the school.

EXCEPTIONS FOR STAFF, STUDENTS AND VISITORS

The guidance outlined does not apply in the following circumstances:

- If a person cannot tolerate wearing a mask for health or behavioural reasons.
- If a person is unable to put on or remove a mask without the assistance of another person.
- If the mask is removed temporarily for the purposes of identifying the person wearing it.
- If the mask is removed temporarily to engage in an educational activity that cannot be performed while wearing a mask (e.g. playing a wind instrument, engaging in high- intensity physical activity, etc.)
- If a person is eating or drinking
- If a person is behind a barrier
- If while providing a service to a person with a disability or diverse ability (including but not limited to a hearing impairment) where visual cues, facial expressions and/or lip reading/movements is important.

Schools must not require a health care provider note to confirm if staff, students, or visitors cannot wear a mask.

No student should be prevented from attending or fully participating at school if they do not wear a mask.

IMPROVEMENTS TO SCHOOL VENTILATION SYSTEMS

At this time, there is no evidence that a building's ventilation system, in good operating condition, would contribute to the spread of the virus. Bulkley Valley Christian School has regular maintenance and filters will be changed each year. Bulkley Valley Christian School has an air exchange system that is inspected regularly.

EMERGENCY AND EVACUATION DRILLS

Schools will continue to practice emergency and evacuation drills, including the six required annual fire drills per year. Schools will modify current drill procedures to adhere to health and safety guidelines.

COMMUNICATION AND TRAINING/ORIENTATION

Bulkley Valley Christian School will continue to consistently communicate guidance, recommendations and Orders from regional Medical Health Officers and the Provincial Health Officer (PHO), including COVID-19 resources.

Bulkley Valley Christian School's JOSH Committee (Joint Occupational Safety and Health) meets every month and will revise the school's Communicable Disease Plans for 2021-2022 as necessary.

CURRICULUM, PROGRAMS AND ACTIVITIES

All curriculum, programs and activities will operate in alignment with the Provincial K – 12 Health and Safety Guidelines, including school-led activities held off campus (e.g. sports academies, community-based programs/courses). Schools will continue to implement ongoing communicable disease prevention practices specific to the activity. BVCS currently has a COVID policy for extra curricular sports.

Field Trips

Staff should follow existing school policies and procedures as well as the guidance in the school and district communicable disease plans. BVCS will respect protocols of organizations they are visiting.

Food/Culinary Programs

Schools can continue to include food preparation as part of learning programs for students. Staff and students will be following the guidelines set out by Work Safe, Food Safe and the BCCDC to ensure cleaning and disinfecting measures as well as hand hygiene are followed.

Food Services

Bulkley Valley Christian School will continue its hot lunch program.

Fundraisers

Schools can continue to offer fundraisers that can be implemented as outlined in the Provincial COVID-19 Communicable Disease Guidelines. The [Guidelines for Food and Beverage Sales in BC Schools](#) will continue to guide our practices.

Kindergarten Program and Entry

Information about communicable disease prevention measures that will be in place in schools will be shared with students and their families. Parents/caregivers will follow the guidelines for Visitors in our schools. We recognize that Kindergarten students are just learning about personal space, and this will be an area of learning for them. Hand hygiene will be necessary and effective in adding a layer of protection for the students.

Music Programs

All classes, programs and activities will continue to occur where:

- K – 12 staff and Grade 4 to 12 students wear masks when indoors. Masks can be temporarily removed while engaging in an educational activity that cannot be performed while wearing a mask (e.g. playing a wind instrument), but must be worn while singing.
- Cleaning and disinfecting guidelines will be followed for shared equipment
- Hand hygiene will be followed
- Music Teachers will access further guidance from *Guidance for Music Classes in BC During Covid-19*.

Physical and Health Education (PHE)/Outdoor Programs

- Spread out students and staff within available space and encourage outdoor activities and programs, as much as possible.

- K- 12 staff and students in Grades 4 to 12 are required to wear masks during PHE/Outdoor program classes when they are indoors, and a barrier is not present.
- Students are not required to wear masks during high intensity physical activities (e.g. stationary bike, weightlifting, basketball, soccer). Mask use during these activities is left to students' personal choice. Staff are encouraged to move high-intensity physical activities outdoors whenever possible.
- For low intensity activities (e.g. yoga, walking), students are required to wear masks when they are indoors and a barrier is not present.

Why are masks not required during high intensity physical activity? During high intensity physical activity, respiration rates are increased (resulting in a wet mask) and the wearer is more likely to touch their face and adjust the mask frequently. These factors lessen the protective value a mask may offer. In addition, a wet mask is more difficult to breathe through; those wearing masks during high intensity activities should change them as soon as they become wet.

Cleaning, disinfecting, and hand hygiene are two extra layers of protection that will be practiced when students and staff are sharing equipment.

Playgrounds

Playgrounds are a safe environment. Staff will ensure students are practicing proper hand hygiene and encourage minimal physical contact between students on the playground.

School Libraries/Learning Commons

At this time, there is no evidence that the COVID-19 virus is transmitted via textbooks, paper, or other paper-based products. As such, the distribution or sharing/return of books or paper-based educational resources to students because of COVID-19 will not be limited.

- Students and staff will practice diligent hand hygiene before and after handling shared equipment and resources

School Sports

Programs, activities (intramurals, sports team practices, games), sports academies will continue in alignment with the following guidance:

- Following relevant local, regional, and provincial public health recommendations and orders for community gatherings and events. At this time, only individual games with 2 teams are allowed with no tournaments or playdays.
- Masks are worn by K – 12 staff, other adults and students grades 4 to 12 when they are indoors, and a barrier is not present
- Students are not required to wear masks during high-intensity sport activities. It is students' personal choice whether they wear masks.
- For low intensity sport activities, students Grades in 4 to 12 are required to wear masks when a barrier is not present.
- Use all available space to spread students and staff out as much as possible.

- Shared equipment can be used, and staff will encourage hand hygiene and use cleaning and disinfection guidelines.
- Sports activities should be held outside whenever possible.
- We will use the [Return to School Sports Plan](#) from [BC School Sports](#) for further guidance.

Theatre, Film and Dance Programs

- Spread out students and staff within available space, and encourage outdoor activities and programs, as much as possible.
- K – 12 staff are required to wear masks during these programs when they are indoors, and a barrier is not present
- Students in Grades 4 to 12 are required to wear masks during these programs when they are indoors and a barrier is not present, except during high-intensity physical activity.
- Shared equipment will be cleaned and disinfected as per guidelines and proper hand hygiene will be practiced

Work Experience

Students can still engage in work placements in accordance with the current guidelines from Provincial Health and Work Safe along with the Ministry Work Experience Program Guide.

APPENDIX A: COVID-19 SYMPTOMS, TESTING & RETURN TO SCHOOL

When a student, staff or other adult can return to school depends on the type of symptoms they experienced and if a COVID-19 test is recommended. See the [K-12 Health Check app](#) [When to get tested for COVID-19](#)

Parents/caregivers can also use the BCCDC online [Self-Assessment Tool](#), or call 8-1-1 or their health care provider.

Symptoms of common respiratory illnesses can persist for a week or more. -Resting is not needed unless the person develops a new illness BCCDC has information on receiving negative test results.

Public health will contact everyone with a positive test. Visit the BCCDC website for more information on positive test results.
