

# Rooted & Growing

*“A Christian education is not secular education with a halo, and a school does not become a Christian school because the teaching of the Christian religion is one of the subjects in the curriculum. Christian education is education in a school which embodies Christian attitudes and insights in its corporate life and in which Christian insights find expression in every subject in the curriculum.”*

—THE BISHOP OF LONDON, ENGLAND

For over 63 years, Bulkley Valley Christian School has been rooted in a mission to shape lives for Christ's kingdom, where “Christian insights find expression in every subject in the curriculum.”

When kindergarten students discover God's goodness in a school garden harvest, they're being rooted in our mission. When high school students encourage each other on a volleyball court, they're growing in our mission. When Grade 11 students wonder at the beauty they're seeing in the science lab microscopes, they're seeing our mission developed. And when our alumni serve their neighbours with Christ-like humility, they're seeing our mission fulfilled.

Gardens, gyms and science labs all form the important infrastructure for our mission. These are the places that make transformation possible. As we live out this mission and look to the future, we face two realities: our facility is aging and our enrolment is growing.

**That's why we are developing a comprehensive facility plan.** With this plan we envision an updated and expanded facility which could include: more classrooms, expanded gym facilities, improved social spaces and better energy usage. Together these create more opportunities for classroom programs, student athletic pursuits and student connection—all critical elements in the formation of our students.

With your support, this ‘Together’ campaign prepares us for the urgently-needed upgrades and expansions that will be identified in our facility plan. Our goal for the 2023 Together Annual Campaign is \$75,000.

Please consider making a tax-deductible year-end gift to help us prepare our facility for a new generation of mission impact.
